[column 6, lines 41-62];

enabling to communicate first data representative of the representation to a service via a data network [column 6, line 62 – column 7, line 2]; and

receiving second data for programming the control device with control commands for the apparatus [column 7, lines 3-16].

5. As per claim 6, van Ee teaches a programmable remote control device comprising circuitry for determining data representative of a controllable apparatus and for communicating data to a source external to the device [column 6, lines 41-67].

6. As per claim 2, van Ee further teaches the method wherein the first data is representative of a control signal for control of the apparatus [column 6, lines 40-43].
7. As per claim 4, van Ee further teaches the method wherein the determining comprises contacting a third party for acquiring the set [column 6, lines 60-67].
